Doctors' 5-Point Plan for Better Health Care

- Reduce wait times and backlog
- Expand mental health and addictions services
- Improve home and community care
- Strengthen public health and pandemic preparedness
- Give every patient a team of digitally-linked health care providers

OMA's three urgent priorities

Prescription Progress Report 2023

1

Fixing the primary care crisis.

2

Addressing physician-burnout.

3

Expanding and integrating home and community care.

Fixing Primary Care

Right now,
**1 in 5
Ontarians**
are on track to be
without a family doctor
in the next two years

Four in 10

family physicians say they
are considering retiring in
the next five years.

Physician Burn-Out

85%

felt *addressing the system level root causes of physician and provider burnout* would have a

**POSITIVE
EFFECT**

on our health-care system.

Family doctors report they are spending

**19.1 hours
per week**

on administrative
work

Expanding Home and Community Care

93% of doctors felt there was a shortage of mental health and addiction services in their community.

89% felt there was a shortage of home care

Home and community care needs to be better integrated with primary care.

Everyone should have a family doctor to ensure access to these vital services.

Thank you.
