The Plan should ensure equitable access to basic rights such as employment, housing, education, safety, and health care – programs must be no-barrier and apply regardless of Status or location
- 1.3 All governments, when developing budgets and determining government activities, to prioritize resourcing of measures to eliminate social, economic, cultural and political marginalization
- 4.4 All governments to provide supports and resources for educational, training, and employment opportunities for all Indigenous women, girls, and 2SLGBTQQIA people – available within all Indigenous communities.
