# Rogers Cybersecure Catalyst

*Toronto Metropolitan University's national centre for training, innovation and collaboration in cybersecurity*

# Overview

Rogers Cybersecure Catalyst is a not-for-profit owned and operated by Toronto Metropolitan University. Headquartered in Brampton, Ontario, and offering programs and services across Canada, we are a key Canadian centre for training, innovation and collaboration in cybersecurity.

ROGERS  
cybersecure  
catalyst

# A national centre for cybersecurity

*Training, innovation, collaboration*

---

- A globally-recognized cybersecurity certification program
- Customized corporate training solutions
- A commercial accelerator for cybersecurity startups & scale-ups
- A research and industry Fellowship program
- And a number of other cybersecurity programs and initiatives

# Cyber Training for Municipalities

*Tailored training for the unique challenges of municipalities*

---

## **Our range of services are:**

- **Interactive & experiential** — minds-on and hands-on training that is engaging and practical.
- **Customizable** — we tailor our offerings to specific organizational needs and sector.
- **Inclusive** — we offer targeted training for every level of employee.

## **Interactive training sessions tailored for:**

- Elected officials and leaders
- IT professionals
- Municipal staff

# Municipal Training Offering

*Comprehensive cybersecurity training offerings designed to strengthen an organization's cyber posture*

---

The Catalyst delivers on-site and virtual training opportunities to organizations across Canada through a combination of tailored workshops, interactive tabletop exercises and immersive technical scenarios to help your team defend against and respond to emerging cybersecurity threats.

## **Our training offering includes:**

- Executive leadership tabletop exercises;
- Incident response planning workshops;
- Hands-on technical Cyber Range workshops;
- Emergency management exercises

# Law Enforcement

*Strengthening the ability to protect and serve*

---

Developed with input from national, provincial, and municipal law enforcement agencies, we offer **on-site and virtual training** opportunities across Canada through **tailored workshops, interactive tabletop exercises, and immersive technical scenarios** to help your team respond to growing cybercrime and emerging cybersecurity threats.

1. **Cybercrime Investigation Foundations (CIF):** *Master the Fundamentals of Cybercrime Investigation*
2. **Offensive Security for Law Enforcement:** *Get Ahead of Cybercriminals – Ethical Hacking Training for Officers*
3. **Frontline Police Officer’s Orientation to Cybercrime:** *Equip First Responders to Navigate Cybercrime Calls Confidently*

# Hire Cyber Talent

*The Catalyst can help meet organizational hiring needs and build a company's cyber talent pipeline — at no cost to employers*

---

## **The Catalyst can offer access to top candidates:**

- Job-ready, mid-career professionals backed by quality training and accredited certifications;
- Free candidate-matching to help expedite recruitment processes;
- Opportunities to connect directly with the Catalyst's talent pool through virtual events.

Catalyst talent hold globally-recognized SANS GIAC certifications, have hands-on experience in cyber, and are rigorously pre-screened.
